Mr. Jed Margolin

Reno NV 89521-7430

Dear Mr. Margolin

This is in response to your 18 July 2010 requests for a fee waiver for your Freedom of Information Act (FOIA) request numbers 2010-05988 (Beale) and 2010-05989-F (Nellis) for copies of all documents relating to the use of Synthetic Vision in operating the RQ-4 and other Unmanned Aerial Vehicles, Unmanned Aerial Systems, or Remotely Piloted Vehicles operated by the Air Force.

The FOIA, Title 5, USC 552(a)(4) provides that an agency may waive all or a portion of the assessed fees, if disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations of the government and is not primarily in the commercial interest of the requester. Such a determination is also based on the existence and magnitude of interest by the public. The requester must tell how he or she plans to communicate the information to the public. At the present time internet bloggers are not considered under the news media category. Freelance journalists must demonstrate a solid basis for expecting publication through an established news media organization. In addition our research indicates you are interested in selling a patent involving a synthetic vision product to the government; this could place you in the commercial category. However, in this instance, we will place you in the all others category. As such, you will receive the first two hours of search free and the first 100 pages free. Additional search will be assessed at $44.00 per hour and pages in excess of 100 will be assessed at 15 cents per page.

We will hold your request in abeyance until we receive further justification for a fee waiver or a promise to pay based upon the information provided in the preceding paragraph. Please provide your response by 23 August 2010. Reference the assigned FOIA case numbers in all correspondence. If you have any questions concerning this matter, please call us at (757) 764-2265/2261.

You may appeal our denial decision by writing to the Secretary of the Air Force within 60 days from the date of this letter. If no appeal is received, or if the appeal is postmarked after the conclusion of this 60-day period, the appeal may be considered closed. Include your reasons for reconsideration along with a copy of this letter. Mail to:

> Secretary of the Air Force
> Thru: HQ ACC/A6CK (FOIA)

Dear TSgt Kennerly,

As you may know I filed a second FOIA Request on July 18. See attached file *jm_foia2_1.pdf*

I received a response today via email from Colonel David Hunninghake denying my request for the
journalist exemption. See attached file *jm_foia2_2.pdf* .

Since I was given the journalist exemption in my first FOIA Request by several USAF Locations and by
several other Federal Agencies in my FOIA Requests to them, I consider this an overtly hostile action by
USAF.

Please ask Colonel Hunninghake to change his mind.

Sincerely yours,

Jed Margolin

Dear Ms. Brown.

I am inclined to accept your offer.

However, over the years USAF has visited my Web site so many times that I feel you should sweeten your offer just a bit.

Please see attached file *jm_af1.txt* for **af.mil** visits to my Web site.

Please tell the guys and gals at WPAT, Beale, and Nellis that this is the one they should read: United States Provisional Application for a Patent **System and Method For Sensing Aircraft and Other Objects** Application Number 61/256,765.

It teaches how to sense other aircraft without being sensed. The USPTO forgot to send it out for a security review.

In an article I wrote about my experience in a hospital in San Jose I found out what was in the GI Cocktail they gave me. It wasn't what they told me was in it in the ER. There are some conditions for which the GI Cocktail is the worst thing to give someone, like it was for me. I may have saved an airman's life with that information.

Many accesses were for the design of random scan video displays that I worked on at Atari. The articles have been very popular with Defense Contractors, Government Labs, and Military Commands such as USAF. I didn't think they were interested in old video game technology. I realized that my articles taught how to precisely control magnetic fields, and one of the uses for precisely controlling magnetic fields is for Free Electron Lasers (FELs). (If you are interested in an improved Wiggler for FELs let me know. It's simpler, cheaper, and more rugged than the Wigglers currently being used.)

"http://members.tripod.com/kmi9000/kmi_multim.htm" "Mozilla/4.0 (compatible; MSIE 6.0; Windows NT 5.1; SV1)"
```

The above are a very small sample of USAF's visits.

Ms. Brown, in view of my service to USAF over the years I think you should waive the per-page fee entirely.

At the very least, you should give me the first 4,000 pages for free.

If there are more than 4,000 pages, tell me how many, and then we can talk about money.

Sincerely yours,

Jed Margolin

P.S. - I seem to have some fans at Vandenberg. However, lately they have been using afnoc as a proxy server. One of the reasons for using a proxy server is to hide your location. Tell them that it didn't work. (They probably didn't want me to know that they had Googled me.)

Dear Mr. Margolin

This is in response to your 18 July 2010 Freedom of Information Act request for records related to the use of synthetic Vision in operating Unmanned Aerial Vehicles.

The 432 Operations Group does not use Synthetic Vision. Therefore, there are no records responsive to your request.

If you interpret this "no records" response as an adverse action, you may appeal it in writing to the Secretary of the Air Force within 60 calendar days from the date of this letter. If no appeal is received, or if the appeal is postmarked after the conclusion of the 60-day period, the appeal may be considered close. Include your reasons for reconsideration and attach a copy of this letter.

Dear Ms. Brown.

I am inclined to accept your offer.

However, over the years USAF has visited my Web site so many times that I feel you should sweeten your
offer just a bit.

Please see attached file *jm_af1.txt* for **af.mil** visits to my Web site.

Many of USAF's visits are related to the field of synthetic vision or are useful in implementing synthetic
vision.

I will list some of the most popular ones. The accesses are only exemplars.

Dear Ms. Brown.

I assume you are speaking for Beale (FOIA 2010-05988). Nellis (FOIA 2010-05989-F) has already responded with an answer of "No Documents" with no further discussion of a fee waiver.

Dear Ms. Brown.

I am inclined to accept your offer.

However, over the years USAF has visited my Web site so many times that I feel you should sweeten your offer just a bit.

Please see attached file jm_af1.txt for af.mil visits to my Web site.

Many of USAF's visits are related to the field of synthetic vision or are useful in implementing synthetic vision.

Please tell the guys and gals at WPAT, Beale, and Nellis that this is the one they should read: United States Provisional Application for a Patent System and Method For Sensing Aircraft and Other Objects Application Number 61/256,765.

It teaches how to sense other aircraft without being sensed. The USPTO forgot to send it out for a security review.

In an article I wrote about my experience in a hospital in San Jose I found out what was in the GI Cocktail they gave me. It wasn't what they told me was in it in the ER. There are some conditions for which the GI Cocktail is the worst thing to give someone, like it was for me. I may have saved an airman's life with that information.

Many accesses were for the design of random scan video displays that I worked on at Atari. The articles have been very popular with Defense Contractors, Government Labs, and Military Commands such as USAF. I didn't think they were interested in old video game technology. I realized that my articles taught how to precisely control magnetic fields, and one of the uses for precisely controlling magnetic fields is for Free Electron Lasers (FELs). (If you are interested in an improved Wiggler for FELs let me know. It's simpler, cheaper, and more rugged than the Wigglers currently being used.)

The above are a very small sample of USAF's visits.

Ms. Brown, in view of my service to USAF over the years I think you should waive the per-page fee entirely.

At the very least, you should give me the first 4,000 pages for free.

If there are more than 4,000 pages, tell me how many, and then we can talk about money.

Sincerely yours,

Jed Margolin

P.S. - I seem to have some fans at Vandenberg. However, lately they have been using afnoc as a proxy server. One of the reasons for using a proxy server is to hide your location. Tell them that it didn't work. (They probably didn't want me to know that they had Googled me.)

Dear TSgt Kennerly,

As you may know I filed a second FOIA Request on July 18. See attached file jm_foia2_1.pdf

I received a response today via email from Colonel David Hunninghake denying my request for the journalist exemption. See attached file jm_foia2_2.pdf .

Since I was given the journalist exemption in my first FOIA Request by several USAF Locations and by several other Federal Agencies in my FOIA Requests to them, I consider this an overtly hostile action by USAF.

Please ask Colonel Hunninghake to change his mind.

Sincerely yours,

ok.

I authorize copy fees of $90 (600 pages in excess of the first 100 pages).

But no duplicates, please.

And no documents that I have sent USAF regarding this matter.

Thank you.

Please tell the guys and gals at WPAT, Beale, and Nellis that this is the
one they should read: United States Provisional Application for a Patent
System and Method For Sensing Aircraft and Other Objects Application Number
61/256,765.

It teaches how to sense other aircraft without being sensed. The USPTO
forgot to send it out for a security review.

In an article I wrote about my experience in a hospital in San Jose I found
out what was in the GI Cocktail they gave me. It wasn't what they told me
was in it in the ER. There are some conditions for which the GI Cocktail is
the worst thing to give someone, like it was for me. I may have saved an
airman's life with that information.

Many accesses were for the design of random scan video displays that I
worked on at Atari. The articles have been very popular with Defense
Contractors, Government Labs, and Military Commands such as USAF. I didn't
think they were interested in old video game technology. I realized that my
articles taught how to precisely control magnetic fields, and one of the
uses for precisely controlling magnetic fields is for Free Electron Lasers
(FELs). (If you are interested in an improved Wiggler for FELs let me know.
It's simpler, cheaper, and more rugged than the Wigglers currently being
used.)

Ms. Brown, in view of my service to USAF over the years I think you should

about money.

been using afnoc as a proxy server. One of the reasons for using a proxy
server is to hide your location. Tell them that it didn't work. (They

Dear TSgt Kennerly,

As you may know I filed a second FOIA Request on July 18. See attached file
jm_foia2_1.pdf

I received a response today via email from Colonel David Hunninghake denying
my request for the journalist exemption. See attached file jm_foia2_2.pdf .

Since I was given the journalist exemption in my first FOIA Request by
several USAF Locations and by several other Federal Agencies in my FOIA
Requests to them, I consider this an overtly hostile action by USAF.

Please ask Colonel Hunninghake to change his mind.

Sincerely yours,

Jed Margolin

Ms. Brown.

ok.

I authorize copy fees of $90 (600 pages in excess of the first 100 pages).

But no duplicates, please.

And no documents that I have sent USAF regarding this matter.

Thank you.

Dear Ms. Brown.

I assume you are speaking for Beale (FOIA 2010-05988). Nellis (FOIA 2010-05989-F) has already responded with an answer of "No Documents" with no further discussion of a fee waiver.

Your response does not say anything about Search Fees. I am not giving USAF a blank check.

These are the highlights of my history of fee waivers with USAF so far.

Case No. 2010-04191-F   Full Fee Waiver Granted

Case No 2010-06428-F   First two hours of search time and 100 pages free.

Case No. 2010-05988   Search time fees unknown, 100 pages free

I see a pattern here of USAF becoming more obstructive with time. Perhaps this is retribution for the article/blog on my Web site where I am writing about my experiences using the Freedom of Information Act at USAF. (You admit to visiting my Web site.)

Or, perhaps I am getting closer to USAF's use of synthetic vision and you do not want to admit you are using it.

Your request for fees is denied.

Since you have denied my Appeal of your denial of my request for a fee waiver please do the following:

1. Confirm that I have exhausted all the administrative remedies that USAF has to offer.

2. Confirm that the address at which USAF accepts legal service is:

Air Force/JACL

1501 Wilson Blvd.

Arlington, VA 22209-2403

If you fail to either confirm this address or supply another one, this is the address I will use for serving USAF when I file suit in U.S. District Court for the District of Nevada.

If, later on, USAF asserts that I served the wrong address I will inform the Court of your refusal to provide, or even confirm, the correct address and ask that USAF be sanctioned.

Sincerely yours,

Jed Margolin

Dear Ms. Brown.

I am inclined to accept your offer.

However, over the years USAF has visited my Web site so many times that I
feel you should sweeten your offer just a bit.

Please see attached file jm_af1.txt for af.mil visits to my Web site.

Many of USAF's visits are related to the field of synthetic vision or are
useful in implementing synthetic vision.

I will list some of the most popular ones. The accesses are only exemplars.

Please tell the guys and gals at WPAT, Beale, and Nellis that this is the
one they should read: United States Provisional Application for a Patent
System and Method For Sensing Aircraft and Other Objects Application Number
61/256,765.

It teaches how to sense other aircraft without being sensed. The USPTO
forgot to send it out for a security review.

In an article I wrote about my experience in a hospital in San Jose I found
out what was in the GI Cocktail they gave me. It wasn't what they told me
was in it in the ER. There are some conditions for which the GI Cocktail is
the worst thing to give someone, like it was for me. I may have saved an
airman's life with that information.

Many accesses were for the design of random scan video displays that I
worked on at Atari. The articles have been very popular with Defense
Contractors, Government Labs, and Military Commands such as USAF. I didn't
think they were interested in old video game technology. I realized that my
articles taught how to precisely control magnetic fields, and one of the
uses for precisely controlling magnetic fields is for Free Electron Lasers
(FELs). (If you are interested in an improved Wiggler for FELs let me know.
It's simpler, cheaper, and more rugged than the Wigglers currently being
used.)

The above are a very small sample of USAF's visits.

Ms. Brown, in view of my service to USAF over the years I think you should
waive the per-page fee entirely.

At the very least, you should give me the first 4,000 pages for free.

If there are more than 4,000 pages, tell me how many, and then we can talk
about money.

Sincerely yours,

Jed Margolin

P.S. - I seem to have some fans at Vandenberg. However, lately they have
been using afnoc as a proxy server. One of the reasons for using a proxy
server is to hide your location. Tell them that it didn't work. (They
probably didn't want me to know that they had Googled me.)

Mr. Margolin,

Since you were previously granted news media status, we will grant your
request. You will however be billed 15 cents per page for pages in excess
of 100.

Linda

Subject: Re: FOIA Case 2010-5988 & 5989 Fee Waiver

Dear TSgt Kennerly,

As you may know I filed a second FOIA Request on July 18. See attached file
jm_foia2_1.pdf

I received a response today via email from Colonel David Hunninghake denying
my request for the journalist exemption. See attached file jm_foia2_2.pdf .

Since I was given the journalist exemption in my first FOIA Request by
several USAF Locations and by several other Federal Agencies in my FOIA
Requests to them, I consider this an overtly hostile action by USAF.

Please ask Colonel Hunninghake to change his mind.

Sincerely yours,

Jed Margolin
